The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5, 8-12, 14-19, 21, 26-32, 34-36, 39, 42-44, 49-51, 54-56, 60, 61, 66, 71, 76 and 81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bors et al.

Bors et al disclose coating compositions comprising film forming polymer and "simple esters of drying oil fatty acids". This recitation is seen as rendering obvious applicants claimed methyl ester of fatty acids. While the reference does not refer to these esters as coalescing aids, their presence in amounts such as claimed instantly would make this function inherent.

Claims 6, 7, 20, 22-25, 33, 37, 38, 40, 41, 45-48, 52, 53, 58-59, 62-65, 67-70, 72-75, 77-80 and 82-96 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
